

FILE SHARING FOR LAW FIRMS

EASY
•
SECURE

Share files with your clients easily and secure

One of the main issues that law firms have is how to share large documents with their clients easy and securely.

IBSCY LTD offers this one time offer to install your own “dropbox-like” device to your premises in order to share small and large files with your clients by sending just a link.

The link that is created, provides to your clients the ability to download their files directly from your premises through an encrypted channel, make changes and upload them back so you do not have all the back-and-forth communication through emails.

Benefits

- Easy to install
- Easy to maintain
- Secure: Files are exchanged through an encrypted connection
