Intelligent Business Solutions

company information

Where the past
meets the present

IBSCY Ltd is a leading provider of total IT solutions and services in Cyprus and specializes in the areas of cloud services and applications, systems integration, IT infrastructure, collaboration, telephony, management, and cybersecurity. Businesses that choose IBSCY as their IT partner, do so because it is a one-stop destination, covering all spectrums of technological needs. Also, the company has the unique ability to combine different technologies to provide solutions to highly complex problems.

IBSCY Ltd was founded in 2004 by a team of young IT professionals and it has evolved since then to serving clients locally and internationally. In May 2015, MTN Cyprus purchased the majority of shares and was operating under the umbrella of MTN Group. In May 2019, IBSCY Ltd was acquired back by the initial shareholders.

Constantly working to improve the company's portfolio and provide clients with new technology solutions and services is considered mandatory. IBSCY Ltd does not only provide the right hardware but also the right expertise in order to utilize the technology in the most efficient way.

cloud services

A virtual, secure world

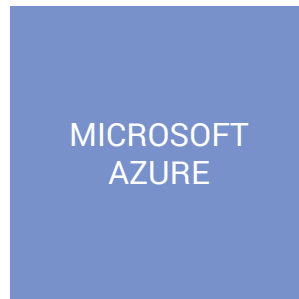

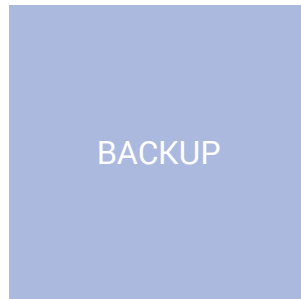

IBSCY Ltd was one of the first IT companies in Cyprus that provided Cloud Services and Cloud Applications to its customers in 2009. Cloud services are considered services that allow any company to transfer day-to-day IT-related operations (e.g. storage, backup, hosting) and management to a third party. This strategy is followed by many multinational companies for the last 20 years in order to reduce their initial investment and take advantage of the expertise of companies like IBSCY Ltd.

Many daily operations can be transferred to the cloud to reduce costs, minimize downtime, and gain access to files from anywhere and any device. Services like file storage, backups, telephony, collaboration tools, cybersecurity, and many more, offer increased efficiency when hosted in the cloud.

As one of the largest Cloud Services provider in Cyprus, IBSCY can manage and assume responsibility for all the services that are provided to customers. As the Cloud Service provider of the company, a predictable IT support cost is offered without any drawbacks or additional costs during the cooperation.

cloud services

hosting services

Your business journey
on a safe road

IBSCY Ltd offers hosting services to any size and type of organization. Hosting service is a type of Internet hosting in which a company is able to buy or lease an entire server with one or many applications/services installed which will not be shared with anyone. The company has the expertise and resources to offer hosted and collocation services in Cyprus.

This service is more flexible than shared hosting and cloud hosting since your organization has full control over its server(s), including choice of operating system and hardware. Server administration can be provided by your IT department or by IBSCY's experienced engineers as an additional service. Hosting service is offering fewer overheads since you do not need to invest in a data center and also provides a better return on investment for your organization.

Dedicated servers in Cyprus are housed in high security and 24/7 surveillance Tier III data center, providing redundant power sources and HVAC systems.
